## SKINSECRET Body Milk

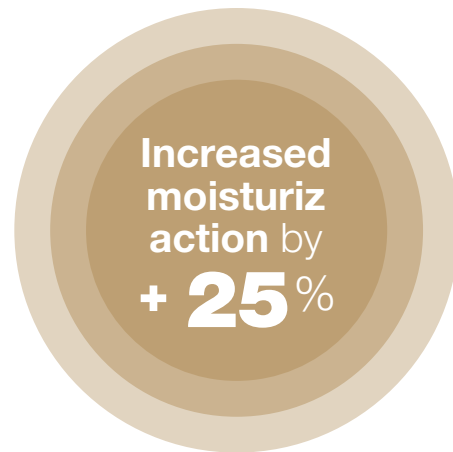

### Clinically proven results

As your skin gets older its is normal for moisturization to become more difficult.

Another sign of skin aging is loss of elasticity.

After studying the use of this product by 32 women, we found that SKINSECRET Body Milk **has a significant moisturizing effect**. Increased skin moisturization measured by corneometer after 28 days of using the **SKINSECRET Body Milk showed an increase in moisturization by more than 25%**. In addition, measu-

rement with a cutometer showed an **increase in skin elasticity** in the tested areas (abdomen or thigh).

### Moisture and Softness

At the end of the study **over 93% of participants** said that SKINSECRET Body Milk had made their skin moister, while **96% said that their skin was softer**. It is no surprise that **over 96% of women like SKINSECRET Body Milk or like it a lot**.
